

## John Shetron

870-834-6057 | [jd.shetron@gmail.com](mailto:jd.shetron@gmail.com)

### SUMMARY

Analytical professional with hands-on experience bridging civil engineering operations and data-driven decision-making within a consulting environment. Proven ability to integrate field data, engineering workflows, and business intelligence tools (SQL, Power BI, Survey123) to improve project efficiency, reporting accuracy, and client outcomes. Experienced supporting multidisciplinary teams across infrastructure projects, translating technical data into actionable insights that drive project performance and scalability.

### EDUCATION

#### University of Arkansas, Fayetteville, Arkansas

Master of Applied Business Analytics | Expected May 2027

Bachelor of Science in Business Administration, Information Systems | December 2025

Relevant Coursework: Systems Analysis & Design, Business Application Development, Business Intelligence

### PROFESSIONAL EXPERIENCE

#### McClelland Consulting Engineers – Fayetteville, Arkansas

*Civil Engineering Intern / Geotechnical Field Technician and Construction Inspector / Business Analyst*

**March 2022 – Present**

- Bridged **engineering field operations and analytics** by integrating Survey123 and SQL-based systems, transforming raw field data into structured datasets used for project reporting and decision-making.
- Digitized geotechnical and construction reporting workflows, reducing reporting time from **~60 minutes to under 5 minutes**, improving real-time data availability for project teams.
- Developed and deployed **Power BI dashboards** to monitor project performance, identify inefficiencies, and support leadership decisions across multiple active infrastructure projects.
- Automated reporting pipelines using **Power Automate and SQL Server**, improving data accuracy and enabling scalable reporting across projects.
- Partnered with engineers, project managers, and clients to deliver **data-backed insights** that improved project execution and communication.
- Supported technical proposal development and reporting, aligning engineering deliverables with client requirements and project objectives.
- Contributed to large-scale infrastructure and development projects including:
  - Alice Walton School of Medicine
  - Walmart Home Office Campus
  - Fort Smith Regional Airport

#### Atlas Asphalt – Batesville, Arkansas

*QC/QA Lab Technician*

**May 2020 – March 2022**

Conducted materials testing to ensure compliance with **state and federal engineering standards**, directly supporting infrastructure quality and safety.

- Maintained and analyzed testing data, contributing to **process improvements and product consistency** across production operations.
- Collaborated with production and engineering teams to ensure alignment between lab results and field application requirements.

### PROJECTS

- **Engineering Data & BI Integration**  
Designed Power BI dashboards using simulated ERP and operational datasets to replicate real-world infrastructure reporting, identifying inefficiencies and performance trends.
- **Systems & Application Development**  
Built a C# inventory management system to improve tracking accuracy and workflow efficiency, demonstrating systems thinking and process optimization.
- **Database & Data Transformation**  
Developed SQL queries for data cleaning, transformation, and reporting, enabling reliable insights from large and unstructured datasets.

### SKILLS

Technical Skills: SQL, Power BI, C#, Excel (Advanced), SAP & ERP, Salesforce, PowerAutomate, Survey123

Professional Certifications: Business Analyst Certification (In Progress) – DataCamp

• Center for Training Transportation Professionals (CTTP) – Basic Aggregates Testing

• Center for Training Transportation Professionals (CTTP) – Concrete Field Testing

Personal Certifications:

• Eagle Scout, Boy Scouts of America
